Dear X,

Highland 4x4 Response – Supporting Your Organisation

Highland 4x4 Response is a volunteer organisation that provides manpower and suitable vehicles to help your organisation fulfil its commitments in times of severe weather and in conditions where normal vehicles should not or cannot be used.

Our volunteers are all assessed in terms of their capability and their vehicle's suitability and many volunteers have received advanced levels of training in using their vehicles and providing support in arduous conditions. We carry our own liability insurance and we are part of the National 4x4 Response Network.

We operate under a memorandum of understanding that is agreed with each organisation to ensure the service meets the needs of the organisation and falls within the scope and capability of Highland 4x4 Response. We charge an agreed mileage fee (currently 40p) and a nominal call-out fee (currently £10) to cover the volunteer's and our costs.

Included are some examples of where Highland 4x4 Response could potentially assist your organisation; further enquires or information contact info@highland4x4response.co.uk through our web site :

www.highland4x4response.co.uk

Yours Sincerely (or faithfully if addressed to dear sir),

HIGHLAND 4x4 RESPONSE GROUP

Examples of where Highland 4x4 Response could potentially assist your organisation?

Essentially Highland 4x4 Response provides a means of transporting people and/or equipment to and from locations during severe weather such as snow and floods or where it is necessary to use access routes that a normal vehicle cannot cope with.

Examples of Highland 4x4 Response Support Tasks include:

- Getting doctors to patients in need of medical care during severe weather
- Delivering necessary medication to patients cut off by snow
- Delivering food to families cut off by snow
- Getting police officers to an incident scene in severe weather
- Getting Home Carers to their remote clients in snow
- Taking District Nurses to their patients in snow
- Providing food and water to drivers and passengers stuck in their vehicles due to snow or Road traffic accident
- Providing logistic support to Local Authorities during floods
- Evacuation of residents during flood and other emergency conditions
- Getting essential Doctors and Nurses to Hospitals in snow
- Supporting rescue organisations in severe weather and in arduous terrain
- Providing transport for Police Officers in snow and floods
- Getting people and equipment close to scene in emergencies such as heath fires
